

Martin Apollo Sim

916-829-9519 | Martinsim@berkeley.edu | Berkeley, California | [Github](#) | [LinkedIn](#) | [Website](#)

Education

University of California, Berkeley

Expected May 2029

Bachelor of Science in Electrical Engineering and Computer Science

Relevant Coursework:

- **Completed:** Structure and Interpretation of Computer Programs, Linear Algebra & Differential Equations, Machine Learning Honors
- **Spring 2026:** Data Structures & Algorithms, Foundations of Signals, Dynamical Systems, and Information Processing

Projects

Weight Lifting Tracker App

React, Node.js, Express, MongoDB

- Developed a full-stack MERN application to track gym progress, visualizing volume load using Recharts
- Created a RESTful API with Node.js and Express to handle CRUD operations, using Mongoose to validate data entry format
- Deployed app using Vercel for frontend, Render for Backend, and MongoDB for data storage

Ants vs Some Bees Project (CS61A)

Python, Object-Oriented Design

- Implemented a class hierarchy using inheritance and polymorphism to model different game entities
- Utilized OOP patterns including composition and method overriding for specialized attack logic

Custom Keyboard YouTube Channel - Simulator Tech

Founder/Content Creator

- Built and grew a YouTube Channel to 3,000+ subscribers and 7,500+ weekly views building and reviewing custom mechanical keyboards
- Partnered with 20+ companies in the mechanical keyboard industry for sponsorships
- Commissioned, built, and sold 15+ keyboards to clients worldwide
- Created high-quality videos by independently learning video/photo editing in Adobe Suite
- Designed and Prototyped custom mechanical keyboards using Fusion360, collaborating with other keyboard designers to ensure accuracy and to bring open-source resources to other community members

11b Combat Robot

Hardware Co-Designer & Assembler

- Designed and assembled a 11b hammersaw style combat robot from the ground up in a 3-person team
- Fabricated components using CAD iterating for weight and size constraints
- Soldered and integrated electrical components including motors, electronic speed controllers, receivers, and wiring harnesses

Experience

Computers 4 Kids

June 2024 - August 2024

Volunteer Technician

Sacramento, CA

- Led a team of 5 interns and volunteers to restore 30+ computers, reducing e-waste and providing resources to low-income students
- Diagnosed hardware failures and performed repairs including SSD replacement, RAM upgrades, OS reinstalls
- Implemented software updates and basic system hardening techniques to ensure device security for users

CyberPatriot Club

2022 - 2025

Club President

Franklin High School

- Created original practice material and organized weekly meetings to help members develop necessary cybersecurity skills for competitions
- Mentored 9 teams (50+ students) in system hardening and cybersecurity practices for Windows

Skills

- Languages & Frameworks: Python (Machine Learning with Jupyter, Scikit-Learn), Java, JavaScript (React, Node.js, Express), HTML, CSS, SQL, Scheme
- Engineering & Hardware: Fusion360 (CAD), Soldering, Computer Building and Repair
